

Green Eye

How does it work?

Gravity

The Green Eye is a color changing termite alert that contains termite's favorite food source, cellulose. The cellulose supports a colored weight that drops when the termites attack.

Simple

Termites are simple creatures finding them should be too!

No need to open the alert until the visual detection shows termites are attacking.

Before

After

Q: Why do home owners buy these items?

- Smoke Detectors
- Carbon Monoxide Detectors
- Security Systems

A: Protection

Then, why wouldn't home owners buy an alert that shows the presence of termites for **protection**?
